

Paper Plate Fluttering Butterfly

Butterfly is attached to a stand which allows it to flutter in the wind.

What you will need:

Dinner-sized paper plates

Scissors

Crayons or Markers

Paint

Chenille Stems (Pipe Cleaners)

10mm Wiggly Eyes

Aleene's Tacky Glue or a Low Temp Mini Glue Gun

How to Make Paper Plate Fluttering Butterfly:

1. Print out the Butterfly Pattern (Printing Problems?) and cut it out. Place the pattern on the paper plate so that the top and bottom wings touch the edge of the plate. Trace the pattern then turn it over and place it on the other half of the paper plate and trace it. It should look like a butterfly.
2. Cut on the solid lines. Do not cut the line between the antenna.
3. When it is cut out color it and then fold the butterfly in half so that the top of the paper plate is up. Fold the other piece between the top wings and antennae down or the opposite way. Then fold the line between the antenna down. This will be the stand. You may have to cut the stand a little flatter on the bottom edge.
4. Place a small piece of tape on the back side of the butterfly between the antenna and the butterfly at the fold.
5. Have kids write on Paper Plate- "God has a Dream for my life"
